

1. CORE COMPLIANCE MANAGEMENT (25 Features)

Framework Management

1. Multi-Framework Support - SOC 2, ISO 27001, HIPAA, GDPR, PCI-DSS, NIST, and custom frameworks
2. Framework CRUD Operations - Create, read, update, delete frameworks
3. Framework Templates - Pre-built templates for common frameworks
4. Unicode Framework Names - Support for international characters
5. Framework Notes - Add notes and comments to frameworks
6. Framework Export - Export frameworks to PDF/CSV
7. Framework Import - Import frameworks from external sources
8. Framework Versioning - Track framework changes over time

Control Management

9. Control CRUD Operations - Create, read, update, delete controls
10. Control Mappings - Map controls across multiple frameworks
11. Control Mapping Suggestions - AI-powered control mapping recommendations
12. Control Search - Advanced search with filters
13. Control Pagination - Efficient loading of large control sets
14. Control Assignments - Assign controls to team members
15. Control Status Tracking - Track implementation status (Not Started, In Progress, Completed)
16. Control Dependencies - Define control dependencies and relationships
17. Control Owners - Assign ownership to specific personnel
18. Bulk Control Updates - Update multiple controls at once

Evidence Management

19. Evidence Upload - Upload evidence files (documents, screenshots, logs)
20. Evidence Versioning - Track multiple versions of evidence with history
21. Evidence Version Restore - Restore previous versions of evidence
22. Smart Upload - AI-powered evidence classification and control matching
23. Evidence Confidence Scores - AI confidence scores for automatic classifications
24. Evidence Analysis - Deep analysis of evidence content
25. Evidence Export - Export evidence packages for auditors

2. AI-POWERED FEATURES (30 Features)

AI Compliance Tools

26. Policy Generator - Generate compliance policies from framework templates
27. Gap Analysis - AI-powered gap analysis between current state and target framework
28. RFP Responder - Automatically respond to security questionnaires and RFPs
29. BCP Generator - Generate Business Continuity Plans
30. Contract Analyzer - Analyze contracts for compliance risks
31. Vendor Scorer - Score vendors on security/compliance posture
32. Data Mapper - Map data flows and classify sensitive data
33. Phishing Training Generator - Generate phishing training campaigns
34. AI Report Generator - Generate comprehensive compliance reports
35. Compliance Chat - AI chatbot for compliance questions

AI Risk Management

36. AI Risk Scanning - Automatically scan and identify new risks
37. Risk Prioritization - AI-powered risk prioritization
38. Risk Remediation Suggestions - AI-generated remediation plans
39. Risk Prediction - Predict future compliance risks
40. Risk Heat Maps - Visual risk heat map generation

- 41. Risk Correlation Analysis - Identify correlated risks
- 42. Risk Trajectory Tracking - Track risk trends over time

Visionary AI

- 43. Compliance Trajectory Analysis - Predict compliance trajectory
- 44. Regulatory Change Impact Analysis - Analyze impact of regulatory changes
- 45. Compliance Debt Tracking - Track and manage compliance debt
- 46. Control Loop Optimization - Optimize control effectiveness
- 47. Agentic Actions - Autonomous compliance actions
- 48. AI Suggestions - Contextual AI suggestions throughout the platform

NIST AI RMF (AI Risk Management Framework)

- 49. AI System Registry - Register and track AI systems
- 50. AI System Risk Classification - Classify AI systems by risk level
- 51. GOVERN Function - AI governance assessments
- 52. MAP Function - Map AI risks and impacts
- 53. MEASURE Function - Measure AI trustworthiness
- 54. MANAGE Function - Manage AI risks
- 55. Trustworthiness Characteristics - Assess 7 trustworthiness characteristics
- 56. AI RMF Profiles - Create organizational AI risk profiles
- 57. AI RMF Assessments - Comprehensive AI system assessments
- 58. AI RMF Dashboard - Visual dashboard for AI risk management

3. EU REGULATIONS COMPLIANCE (35 Features)

EU AI Act

- 59. AI System Classification - Classify AI systems (Unacceptable, High, Limited, Minimal risk)
- 60. High-Risk Categories - Identify high-risk AI use cases
- 61. General-Purpose AI Tracking - Track GPAI models
- 62. Generative AI Compliance - Specific requirements for generative AI
- 63. Prohibited Practices Check - Validate against prohibited AI practices
- 64. Transparency Requirements - AI labeling and disclosure requirements
- 65. EU Database Registration - Register high-risk systems with EU database
- 66. Risk Assessment Templates - EU AI Act risk assessment templates
- 67. Transparency Report Generation - Generate EU AI Act transparency reports
- 68. Conformity Assessment - Self-assessment and third-party conformity
- 69. Post-Market Monitoring - Track AI system performance post-deployment

Digital Markets Act (DMA)

- 70. Gatekeeper Assessment - Determine if organization qualifies as gatekeeper
- 71. Gatekeeper Registration - Register as digital gatekeeper
- 72. Core Platform Services Tracking - Track designated core platform services
- 73. DMA Obligations Management - Manage 20+ DMA obligations
- 74. Interoperability Requirements - Track interoperability obligations
- 75. Data Portability Tracking - Manage data portability requirements
- 76. Anti-Steering Compliance - Track anti-steering provisions
- 77. Self-Preferencing Monitoring - Monitor for self-preferencing
- 78. Most Favored Nation Compliance - Track MFN clause compliance
- 79. Business User Access - Manage business user data access
- 80. DMA Compliance Reports - Generate DMA compliance reports
- 81. Obligation Tracking - Track status of all DMA obligations

Digital Services Act (DSA)

- 82. Platform Classification - Classify platform size (VLOP/VLOSE determination)

- 83. User Threshold Tracking - Track monthly active users in EU
- 84. Content Moderation System - Manage content moderation processes
- 85. Illegal Content Reporting - Track and report illegal content
- 86. Transparency Reports - Generate DSA transparency reports
- 87. Ad Repository - Maintain advertising repository
- 88. Risk Assessments - Conduct DSA systemic risk assessments
- 89. Non-Personalized Feed - Provide non-personalized content feed option
- 90. Complaint Handling - User complaint and appeals system
- 91. Out-of-Court Dispute Resolution - ODR provider integration
- 92. Trusted Flagging Program - Manage trusted flagger relationships
- 93. Crisis Response Protocol - Crisis response mechanism

4. ADVANCED SECURITY FEATURES (40 Features)

Zero Trust Security

- 94. Device Trust Verification - Verify device trust with fingerprinting
- 95. Trust Score Calculation - Calculate device trust scores (0-100)
- 96. Zero Trust Policy Engine - Create and enforce Zero Trust policies
- 97. Network Segmentation - Define network segments and trust levels
- 98. Continuous Verification - Continuous device and user verification
- 99. Least Privilege Enforcement - Enforce least privilege access
- 100. Access Request Evaluation - Real-time access request evaluation
- 101. Device Health Monitoring - Monitor device health status
- 102. Conditional Access Policies - Context-based access control

Zero-Knowledge Proofs (zk-SNARKs)

- 103. Compliance Proof Generation - Generate zero-knowledge compliance proofs
- 104. Compliance Proof Verification - Verify compliance without revealing data
- 105. Credential Proof Generation - Prove credentials without disclosure
- 106. Credential Proof Verification - Verify credentials via ZKP
- 107. Ownership Proof Generation - Prove data ownership
- 108. Ownership Proof Verification - Verify ownership claims
- 109. Proof History - Track all generated and verified proofs
- 110. Privacy-Preserving Audits - Conduct audits without data exposure

BYOK (Bring Your Own Key) Encryption

- 111. AWS KMS Integration - Integrate with AWS Key Management Service
- 112. Azure Key Vault Integration - Integrate with Azure Key Vault
- 113. GCP KMS Integration - Integrate with Google Cloud KMS
- 114. HashiCorp Vault Integration - Integrate with HashiCorp Vault
- 115. Custom Key Generation - Generate encryption keys
- 116. Key Import - Import existing encryption keys
- 117. Key Rotation - Automatic and manual key rotation
- 118. Envelope Encryption - Multi-layer encryption
- 119. Key Usage Tracking - Track key usage and access
- 120. Key Deletion Protection - Prevent accidental key deletion

Compliance-as-Code (OPA)

- 121. Policy Authoring (Rego) - Write policies in Rego language
- 122. Policy Evaluation - Evaluate policies against data
- 123. Batch Policy Evaluation - Evaluate multiple policies at once
- 124. Compliance Report Generation - Generate compliance reports from policies
- 125. CI/CD Integration - Integrate with GitHub, GitLab, Jenkins, CircleCI
- 126. CI/CD Webhook Handler - Receive and process CI/CD webhooks

- 127.Drift Detection - Detect configuration drift
- 128.Policy Versioning - Version control for policies
- 129.Policy Testing - Test policies before deployment
- 130.OPA Server Integration - Connect to OPA servers

Blockchain & Evidence Truth Layer

- 131.Ethereum Integration - Integrate with Ethereum blockchain
- 132.Evidence Anchoring - Anchor evidence hashes to blockchain
- 133.Tamper Detection - Detect evidence tampering via blockchain
- 134.Smart Contract Deployment - Deploy compliance smart contracts
- 135.Audit Trail Immutability - Immutable audit trail on blockchain
- 136.Transaction Verification - Verify blockchain transactions
- 137.Hardhat Integration - Hardhat development environment

5. ENTERPRISE FEATURES (25 Features)

Organization & Team Management

- 138.Multi-Tenant Architecture - Complete organization isolation
- 139.Team Management - Add/remove team members
- 140.Role-Based Access Control (RBAC) - Granular permissions
- 141.Personnel Directory - Manage personnel records
- 142.Access Reviews - Periodic access reviews
- 143.Onboarding/Offboarding - Automated user lifecycle management
- 144.Multi-Workspace Support - Multiple workspaces per organization

JIT (Just-In-Time) Access

- 145.JIT Access Requests - Request temporary elevated access
- 146.JIT Access Approval - Approve/deny access requests
- 147.JIT Session Management - Track active JIT sessions
- 148.JIT Session Expiration - Auto-expire temporary access
- 149.JIT Audit Trail - Complete audit log of JIT access
- 150.Emergency Access - Emergency break-glass access

Session Management

- 151.Concurrent Session Limits - Limit simultaneous sessions (max 5)
- 152.Session Timeout - Auto-logout after 30 minutes idle
- 153.Session Warnings - Warn before session timeout
- 154.Active Session List - View all active sessions
- 155.Remote Session Termination - Terminate sessions remotely
- 156.Logout All Devices - Global logout functionality

Integrations

- 157.Google Workspace Integration - OAuth integration with Google
- 158.GitHub Integration - Connect to GitHub repositories
- 159.Slack Integration - Send notifications to Slack
- 160.Jira Integration - Sync with Jira issues
- 161.AWS Integration - Connect to AWS services
- 162.Custom API Integrations - Build custom integrations

6. RISK MANAGEMENT (15 Features)

- 163.Risk Registry - Centralized risk register
- 164.Risk CRUD Operations - Create, update, delete risks
- 165.Risk Severity Levels - Low, Medium, High, Critical
- 166.Risk Filtering & Sorting - Advanced filtering options

- 167.Risk Assignments - Assign risks to owners
- 168.Risk Treatment Plans - Define mitigation strategies
- 169.Vendor Risk Management - Assess vendor risks
- 170.Vendor Assessments - Conduct vendor security assessments
- 171.Vendor Reviews - Periodic vendor reviews
- 172.Vendor Monitoring - Continuous vendor monitoring
- 173.Third-Party Risk Scoring - Automated vendor risk scores
- 174.Risk Heat Map Visualization - Visual risk dashboard
- 175.Risk Trend Analysis - Track risk trends over time
- 176.Residual Risk Calculation - Calculate residual risk
- 177.Risk Correlation Matrix - Identify correlated risks

7. ADVANCED AI SERVICES (25 Features)

ACOS (Autonomous Compliance Operations System)

- 178.Automated Control Monitoring - Autonomous control status checks
- 179.Auto-Remediation - Automated issue remediation
- 180.Compliance Debt Management - Track and reduce compliance debt
- 181.Control Loop Automation - Automated control effectiveness loops
- 182.Change Impact Analysis - Analyze impact of changes
- 183.Predictive Compliance - Predict future compliance issues

Compliance Digital Twin

- 184.What-If Scenario Simulation - Simulate compliance scenarios
- 185.Control Change Simulation - Model impact of control changes
- 186.Policy Update Simulation - Test policy updates before deployment
- 187.Risk Event Simulation - Simulate risk events
- 188.Framework Addition Simulation - Model adding new frameworks
- 189.Baseline Score Calculation - Calculate current compliance baseline
- 190.Simulation History - Track all simulations
- 191.Save/Load Simulation States - Persist simulation states

Red Team Security Testing

- 192.Policy Violation Detection - Identify policy violations
- 193.Compliance Gap Detection - Find compliance gaps
- 194.Misconfiguration Detection - Detect security misconfigurations
- 195.Attack Simulation - Simulate security attacks
- 196.Vulnerability Scoring - Score identified vulnerabilities
- 197.Remediation Recommendations - AI-powered fix recommendations

NeuroSymbolic AI

- 198.Symbolic Reasoning - Logic-based compliance reasoning
- 199.Rule Inference - Infer compliance rules from data
- 200.Knowledge Graph - Compliance knowledge graph
- 201.Reasoning Trace - Explainable AI reasoning paths
- 202.Compliance Deduction - Logical compliance deductions

Federated Swarm ML

- 203.Federated Learning - Privacy-preserving model training
- 204.Swarm Intelligence - Multi-agent compliance optimization
- 205.Model Aggregation - Aggregate federated models
- 206.Peer Collaboration - Collaborate across organizations
- 207.Privacy-Preserving Training - Train models without data sharing

Homomorphic AI

- 208.Encrypted Data Processing - Process encrypted compliance data
- 209.Privacy-Preserving Analytics - Analytics without decryption
- 210.Encrypted Risk Scoring - Score risks on encrypted data
- 211.Homomorphic Encryption - Full homomorphic encryption support

8. REGULATORY INTELLIGENCE & MONITORING (15 Features)

Regulatory Intelligence Fabric

- 212.Regulatory Feed Monitoring - Monitor global regulatory changes
- 213.Automated Change Detection - Detect regulatory updates
- 214.Impact Analysis - Analyze regulatory change impact
- 215.Conflict Resolution - Resolve conflicting regulations
- 216.Multi-Jurisdiction Support - Track regulations across jurisdictions
- 217.Regulatory Timeline - Track regulatory change timeline
- 218.Subscription to Feeds - Subscribe to regulatory sources
- 219.Custom Feed Sources - Add custom regulatory feeds

Continuous Monitoring

- 220.24/7 Control Monitoring - Continuous control monitoring
- 221.Automated Alerts - Real-time compliance alerts
- 222.Anomaly Detection - Detect compliance anomalies
- 223.Monitor Results Tracking - Track monitoring results
- 224.Monitor Configuration - Configure monitoring rules
- 225.Monitor Scheduling - Schedule monitoring jobs
- 226.Monitor History - Historical monitoring data

9. MULTIMODAL & IoT FEATURES (20 Features)

Whisper Audio Transcription

- 227.Audio Transcription - Transcribe audio files via Whisper
- 228.Video Transcription - Transcribe video audio tracks
- 229.Speaker Diarization - Identify different speakers
- 230.Timestamp Generation - Add timestamps to transcripts
- 231.Multi-Language Support - Support for 99+ languages
- 232.Transcription History - Track all transcriptions

Multimodal Intake

- 233.Document Processing - Process documents (PDF, Word, Excel)
- 234.Image Analysis - Analyze images for compliance data
- 235.OCR (Optical Character Recognition) - Extract text from images
- 236.Video Processing - Process video evidence
- 237.Audio Processing - Process audio evidence
- 238.Multi-Format Support - Support 20+ file formats

Physical AI & IoT

- 239.IoT Device Registry - Register and track IoT devices
- 240.Device Health Monitoring - Monitor device health
- 241.Edge Compliance Checks - Run compliance checks on edge devices
- 242.Device Heartbeat - Track device connectivity
- 243.Firmware Validation - Validate device firmware
- 244.Battery Monitoring - Monitor device battery levels
- 245.Connectivity Status - Track device connectivity
- 246.Predictive Maintenance - Predict device failures

- 247.Offline Device Detection - Identify offline devices
- 248.Bulk Health Checks - Check health of multiple devices

MQTT Integration

- 249.MQTT Broker Connection - Connect to MQTT brokers
- 250.Topic Subscription - Subscribe to MQTT topics
- 251.Message Publishing - Publish messages to topics
- 252.Real-Time IoT Data - Process real-time IoT data
- 253.IoT Event Processing - Process IoT events for compliance

10. ML & ADVANCED ANALYTICS (15 Features)

ML Models Training

- 254.Custom Model Training - Train custom ML models
- 255.Risk Prediction Models - Train risk prediction models
- 256.Classification Models - Train classification models
- 257.Regression Models - Train regression models
- 258.Model Evaluation - Evaluate model performance
- 259.Feature Engineering - Engineer features from compliance data
- 260.Model Versioning - Track model versions
- 261.Model Deployment - Deploy models to production
- 262.Model Monitoring - Monitor model performance

Swarm Task Allocation

- 263.Intelligent Task Distribution - Distribute tasks across team
- 264.Workload Balancing - Balance workload across team
- 265.Capacity Planning - Plan team capacity
- 266.Priority Optimization - Optimize task priorities
- 267.Task Dependencies - Manage task dependencies
- 268.Resource Allocation - Allocate resources efficiently

Temporal Graph Network

- 269.Temporal Network Analysis - Analyze compliance networks over time
- 270.Relationship Mapping - Map relationships between entities
- 271.Graph Visualization - Visualize compliance graphs
- 272.Pattern Detection - Detect patterns in compliance data
- 273.Anomaly Detection - Detect graph anomalies

11. VR & COLLABORATION (10 Features)

VR Collaborative Review

- 274.VR Training Scenarios - Create VR training scenarios
- 275.VR Training Sessions - Conduct VR training sessions
- 276.Performance Tracking - Track VR training performance
- 277.Collaborative Sessions - Multi-user collaborative reviews
- 278.VR Session Recording - Record VR sessions
- 279.VR Annotations - Annotate in VR space
- 280.WebRTC Integration - Real-time collaboration via WebRTC
- 281.3D Evidence Review - Review evidence in 3D space
- 282.Virtual Audit Rooms - Conduct audits in VR
- 283.VR Controls Assessment - Assess controls in virtual environment

12. REPORTING & ANALYTICS (20 Features)

Reporting

- 284. Custom Report Builder - Build custom compliance reports
- 285. PDF Export - Export reports to PDF
- 286. CSV Export - Export data to CSV
- 287. Excel Export - Export to Excel format
- 288. Scheduled Reports - Schedule automated reports
- 289. Report Templates - Pre-built report templates
- 290. Executive Dashboards - C-level compliance dashboards
- 291. Compliance Scorecards - Visual compliance scores
- 292. Trend Reports - Compliance trend analysis
- 293. Gap Reports - Compliance gap reports

Real-Time Analytics

- 294. Real-Time Metrics Dashboard - Live compliance metrics
- 295. Compliance Score Tracking - Track compliance score in real-time
- 296. Risk Score Tracking - Track risk score in real-time
- 297. Control Status Overview - Real-time control status
- 298. Evidence Upload Tracking - Track evidence uploads
- 299. Team Activity Feed - Real-time activity feed
- 300. WebSocket Live Updates - Real-time WebSocket updates
- 301. Historical Trend Analysis - Compare current vs historical
- 302. Time Range Filtering - 1h, 24h, 7d, 30d views
- 303. Auto-Refresh - Auto-refresh every 5 seconds

13. BILLING & SUBSCRIPTIONS (15 Features)

Stripe Integration

- 304. Stripe Payment Processing - Full Stripe integration
- 305. Subscription Management - Manage subscriptions
- 306. Monthly/Annual Billing - Flexible billing cycles
- 307. Tiered Pricing - Starter, Professional, Enterprise tiers
- 308. Usage-Based Billing - Track usage for billing
- 309. Invoice Generation - Automatic invoice generation
- 310. Webhook Processing - Process Stripe webhooks
- 311. Payment History - View payment history
- 312. Subscription Upgrades - Upgrade subscriptions
- 313. Subscription Downgrades - Downgrade subscriptions
- 314. Subscription Cancellation - Cancel subscriptions

Feature Marketplace

- 315. A-la-Carte Features - Purchase individual features
- 316. Feature Bundles - Bundle pricing
- 317. Feature Subscriptions - Subscribe to additional features
- 318. Feature Access Control - Control feature access by tier

14. AUTHENTICATION & SECURITY (20 Features)

Authentication

- 319. Magic Link Authentication - Passwordless email-based auth
- 320. JWT Token Management - Secure JWT tokens
- 321. Token Refresh - Automatic token refresh
- 322. Session Management - Secure session handling

Two-Factor Authentication (2FA)

- 323. TOTP 2FA - Time-based OTP authentication
- 324. QR Code Generation - Generate 2FA QR codes

- 325.Backup Codes - 10 backup codes per user
- 326.2FA Enforcement - Enforce 2FA for organization
- 327.2FA Recovery - Account recovery with backup codes
- 328.2FA Disable - Disable 2FA when needed

Security

- 329.XSS Protection - Cross-site scripting protection (Helmet.js)
- 330.CSRF Protection - Cross-site request forgery protection
- 331.SQL Injection Protection - Prisma ORM protection
- 332.Rate Limiting - API rate limiting
- 333.CORS Configuration - Secure CORS settings
- 334.Content Security Policy - CSP headers
- 335.Helmet.js Security - Comprehensive security headers
- 336.Input Sanitization - Sanitize all inputs
- 337.Encrypted Data Storage - Encrypt sensitive data at rest
- 338.Audit Logging - Complete audit trail

15. NOTIFICATIONS & COMMUNICATION (15 Features)

Notifications

- 339.Email Notifications - SendGrid email integration
- 340.In-App Notifications - Real-time in-app alerts
- 341.Notification Preferences - User notification settings
- 342.Notification History - View past notifications
- 343.Slack Notifications - Send notifications to Slack
- 344.Webhook Notifications - Custom webhook notifications
- 345.Assignment Notifications - Notify on task assignments
- 346.Deadline Reminders - Remind about upcoming deadlines
- 347.Status Change Alerts - Alert on status changes
- 348.Risk Alerts - Alert on new or critical risks

Communication

- 349.Secure Chat - Encrypted compliance chat
- 350.Issue Comments - Comment on issues
- 351.Team Mentions - @mention team members
- 352.Chat History - Persistent chat history
- 353.File Sharing in Chat - Share files via chat

16. TRUST CENTER & PUBLIC FEATURES (10 Features)

Trust Center

- 354.Public Trust Center - Public-facing compliance status
- 355.Certificate Publishing - Publish compliance certificates
- 356.Security Posture Display - Display security status
- 357.Custom Branding - Brand trust center
- 358.Certificate Downloads - Download compliance certificates
- 359.Public API - Public trust center API

Demo & Marketing

- 360.Demo Booking - Book product demos
- 361.Landing Page - Marketing landing page
- 362.Pricing Page - Transparent pricing
- 363.Feature Showcase - Showcase features

17. QUESTIONNAIRES & ASSESSMENTS (10 Features)

- 364.Questionnaire Builder - Build custom questionnaires
- 365.Question Management - Create and manage questions
- 366.Response Collection - Collect responses
- 367.Response Analysis - Analyze questionnaire responses
- 368.Questionnaire Templates - Pre-built templates
- 369.Progress Tracking - Track questionnaire completion
- 370.Multi-User Questionnaires - Collaborate on questionnaires
- 371.Questionnaire Versioning - Version questionnaires
- 372.Response Export - Export responses
- 373.Automated Scoring - Auto-score responses

18. POLICY LIBRARY & MANAGEMENT (8 Features)

- 374.Policy Library - Centralized policy repository
- 375.Policy Templates - Pre-built policy templates
- 376.Policy Versioning - Track policy versions
- 377.Policy Approval Workflow - Multi-step approval
- 378.Policy Publishing - Publish approved policies
- 379.Policy Distribution - Distribute to team
- 380.Policy Attestation - Team members attest to policies
- 381.Policy Review Reminders - Periodic policy reviews

19. GOALS & OBJECTIVES (5 Features)

- 382.Compliance Goals - Set compliance goals
- 383.Goal Tracking - Track goal progress
- 384.Goal Deadlines - Set goal deadlines
- 385.Goal Assignments - Assign goals to team
- 386.Goal Completion - Mark goals as complete

20. WEBHOOKS & API (10 Features)

- 387.Webhook Creation - Create custom webhooks
- 388.Webhook Management - Manage webhooks
- 389.Event Types - 50+ webhook event types
- 390.Webhook History - View webhook delivery history
- 391.Retry Logic - Automatic webhook retry
- 392.Webhook Security - Signed webhooks
- 393.API Keys - Generate API keys
- 394.API Rate Limiting - Rate limit API calls
- 395.API Documentation - Complete API docs
- 396.RESTful API - RESTful API design

SUMMARY

Total Features: 396+ Production-Ready Features

By Category:

1. Core Compliance: 25 features
2. AI-Powered: 30 features
3. EU Regulations: 35 features
4. Advanced Security: 40 features
5. Enterprise: 25 features
6. Risk Management: 15 features
7. Advanced AI Services: 25 features
8. Regulatory Intelligence: 15 features
9. Multimodal & IoT: 20 features

10. ML & Analytics: 15 features
11. VR & Collaboration: 10 features
12. Reporting: 20 features
13. Billing: 15 features
14. Authentication: 20 features
15. Notifications: 15 features
16. Trust Center: 10 features
17. Questionnaires: 10 features
18. Policy Library: 8 features
19. Goals: 5 features
20. Webhooks & API: 10 features
